

Technical Hose PVC (PVC, PVC)

- flexible, abrasion-resistant hoses for many industries
- They have a high resistance to UV rays
- when used with liquid oils risk of washout of plasticizer contained in the polyvinyl chloride, which substantially lowers the resistance to UV, and thus the hose becomes brittle
- Technical hose of PVC (PVC, PVC) can be used to transfer hot water without pressure
- Technical hose PVC (PVC, PVC) is resistant to aging even during long-term storage
